## ABSTRACT

The disposal of garbage and wastage are great problem now days in every where. Almost every day you can find a news regarding the same in our local Medias. That's why this wastage problem attracted my attention to select this topic for my project report. These wastes can be divided in to different kinds like market wastes, home wastes; hospital wastes so on and so forth.

Among this I have selected hospital wastes disposal as my heading. Since I am living closer to the General Hospital in our district; I felt it will be easier for me to identify the same and to get a solution for it. My project report consist five chapters each of it has own importance. According to my information collected so far, the irregular disposal of wastes from hospital have caused the following troubles, like cross infection due to improper waste management methods, spreading of communicable diseases due to the increase of mosquitoes and flies etc. etc.

I was able to get all these facts from the respondents, specially the person who is in charge of waste management in the General Hospital of Trincomalee. I have strongly analyze the same in my project report and have given my views on how to handling the same efficiently and effectively.

## ➤ Chapter 01

1.1 Introduction	1
1.2 Objective of the study	2
1.3 Methodology	3
1.4 Limitations	4
1.5 Assumptions	4
1.6 Conceptualization	5

## ➤ Chapter 02

2.1 Environmental pollution	6
2.2 Types of pollutants	6
2.3 Types of pollutions	7
2.4 Waste	11
2.5 Classification of waste	11
2.6 Clinical waste	13
2.7 Management variation of waste	17

## ➤ Chapter 03

3.1 District profile	22
3.2 The Hospital profile	22
3.3 Data collection	24
3.4 Type of waste	25
3.5 Composition of solid waste	26
3.6 Waste collection	27
3.7 Waste disposal method	29
3.8 Knowledge and awareness of waste disposal method	29
3.9 Existing waste management techniques	30
3.10 Problem and inconvenient of existing disposal method	31
3.11 Reasons for inefficient waste disposal	36
3.12 Existing waste management method in Batticaloa Teaching Hospital.	38

➤ Chapter 04

4.1 Introduction	39
4.2 Waste reduction	39
4.3 Reuse	39
4.4 Recycling and recovery	39
4.5 Final disposal	40
4.6 Composition of solid waste	47
4.7 Knowledge and awareness of interviewers.	47

➤ Chapter 05

5.1 Introduction	48
5.2 Proper waste collections	49
5.3 Waste reduction	50
5.4 Reuse	50
5.5 Recycling	50
5.6 Final disposal	51
5.7 Reaction plan	52
5.8 Conclusion	55
