

Question 03

Open the "ABC-Company.xls" file in Hard disk .Use the data in this file to answer the following Questions:

01. Make columns width enough to view all data in the file.
02. Fill the fields Total and Full/Last Name using appropriate formulae using the following details.
 No1. Total is calculated by the following formula "Bill Amount " - "Deduction" and adding 13.5% tax to it.
 No2. In the "Full/Last Name" field, extract the "First name" without "Title" of each customer if the "Title" is "Mr" , extract the "Last name" without "Title" of each customer if the "Title" is "Miss" , else extract the "Full name" without "Title".
03. Save your work as "Name.xls" in your diskette.

Question 04

Create an access Database with the name " Member" in your diskette.
 Create a table with the following fields:

Table Name : CUST

Fields Name	Field Type	Primary Key
Serial	Auto Number	
Name	Text(8)	
Letter	Text(1)	
First	Number	
Second	Number	
Third	Number	

Enter the given records carefully to the table.

Serial	Name	Letter	First	Second	Third
1	Raj	L	19	91	26
2	Rani	K	23	46	74
3	Yoga	L	43	74	69
4	Kumar	T	14	13	86
5	Leela	R	23	46	74
6	Rahu	P	75	12	79
7	Sri	K	46	49	27
8	Dolo	L	19	27	53
9	Niro	O	17	46	23
10	Saro	W	74	46	23

Consider the following conditions to create the queries bellow:

- FirstP: The first price winner is the one who has the ticket which matches exactly with the Price number's Letter, First, Second and Third digits.
- SecondP : The second price winner is the one who has the ticket which matches exactly with the price number's First, Second and Third digits only.
- ThirdP: The third price winner is the one who has the tivket which matches with the Price number's Letter, First , Second and Third digits in any order.

The Price number is	Letter	First	Second	Third
	R	23	46	74
