THIRD EXAMINATION IN SCIENCE 2002/03 & 2002/03 (A)
SECOND SEMESTER (April/May, 2004)
CS 353 : PRACTICAL WORK ON CS 303

Time allowed: Two hours

Create a personal website for Mr. S. Kannappan using XHTML that must be satisfied his tasks as follows:

- ❖ Divide the browser window into two frames, as shown in the *Figure 1*.
 - The frame on left will be a menu (file name as "*menu.html*") consisting of hyperlinks *Home*, *About*, *Guest book* and *Links*. Clicking on any one of these links will lead to a new page, which should be opened in the target frame, which is on the left of the browser window.
 - Frame set does not have borders.
 - Left frame does not have scrolling facility.

- ❖ All pages of the website must be in a same style (eg. Background colour, Heading style,...) **except** left frame page (ie. *menu.htm*).

For this task:

- Create an External Cascading Style Sheet (CSS) (named as "*myWebStyle.css*") with following attributes:

Body:

```
Font face = Verdana, Times;  
Background colour = #EBEBEB;  
Text colour = #008080;  
Font size:11pt
```

Hyperlinks:

```
Normal Link colour = #FF0000;  
Active Link colour = #0000FF;  
Visited Link colour = #800080;
```

Heading 1:

```
Font face = Verdana, Times;  
Text colour = #800000;  
Font style = bold;  
Font size:12pt
```

Define a class name as **myFooter**

myFooter:

```
Font face = Verdana;  
Font size = 10px;  
Font colour = #626262
```

- “myWebStyle.css” must be included in **all pages** of your website except “menu.htm”.

- ❖ You should be format the footer (last updated 26 Feb 2004))of all pagesby using **myFooter** class.
- ❖ The first page should be in the following format (*Figure 2: The left frame has **menu.html** and the right frame has **home.html***) and also when clicking on the hyperlink **Home**, it loads “**home.html**” on the right of the browser window.
