Eastern University, Sri Lanka

Second Examination in Science, First Semester
(2000/2001) - (May – 2000)

MT206–Introduction to C++ and Object Oriented Programming
MT 251 (Practical)

Time: Two Hours.

1) Write a program to store an array of 5 bank records with the following fields :

       * Name – 25 characters

       * Account No – 5 digits

       * N.I.C. No

       * Balance

a. Search the array for a particular record with the given Account No and print the record in a formatted form.

b. Sort the array of records in the ascending order of Account No and print the records in the sorted order.
